# KOSYNergi

- the joint venture between  Key Organics and SYN | thesis

Key Organics, based in the UK, has over 22 years expertise in providing a high quality, flexible, contract FTE service with sharp customer focus and a proven track record with Pharma, agrochemistry and biotechs worldwide.

SYN | thesis is an Australian company, headquartered in Melbourne, Victoria with an operations facility located in Zhangjiang Hi-tech Park East area, Shanghai. They offer flexible business models, from the synthesis of building blocks and reagents, to a fully integrated drug discovery process delivered with an outstanding service.

KOSYNergi is a partnership bringing together the complementary skills, abilities, experience, and innovation of two Western operations with successful track records and proven routes to market.

KO and SYN | thesis have seamlessly merged their considerable expertise, and combined technologies in a cost effective way, to offer unrivalled contract chemistry services for Pharma and biotechs who are

keen to reduce costs and leadtimes without compromising on reliability and quality of service.

In addition, KOSYNergi has excellent business links with East and West coast US, Australasia and European markets, and offers local Business Development support for clients' bespoke needs and changing priorities.
